### Ordinance 733

In 2007 the Town had employees that were looking to better their training in relationship to their job. This training was in the form of advanced education (college degrees, master's degrees, some technical skills with certifications that aren't required but may be utilized in job duties i.e. welding). In discussion with department heads and councilmembers I proposed establishing an ordinance that would allow those programs to be considered for reimbursement.

After reviewing the ordinance, there has been a request to reword and clarify the process and expectations. This ordinance is up for introduction and discussion.
